

Activities – Transportation

District transportation may be used to transport students to inter-school events, such as extra-curricular activities, as appropriate and upon approval by the director of transportation or designee.

In addition to the bus driver, a faculty sponsor shall be in charge of each trip unless the driver or transportation director deems it unnecessary and will be responsible for maintaining a degree of order that is conducive to the safe operation of the vehicle.

All students transported to events by school transportation must return on the transportation unless an exception is permitted by the school administration or designee.
